

SRO TRANSFORMATION ARCHITECTURE

Your Land Tax Architecture, Mapped & Optimized

Establish the foundation. Build the practice. Enable transformation.

This three-phase approach establishes business architecture and capability-based planning as a core practice. By mapping your Land Tax operation across six value streams, 50+ capabilities, and three strategic lenses, you'll build the organizational foundation needed to identify gaps, prioritize investments, and execute transformation with confidence.

Your Strategic Roadmap

A three-phase approach to capability assessment and optimization

CORE CONCEPT

Discover Your Capability Gaps

Map every capability across your Land Tax operation. Identify which capabilities are strong, which need investment, and where transformation opportunities exist.

Six interconnected value streams deliver Land Tax outcomes from records through resolution.

CORE CONCEPT

Understand Business Capabilities

Business capabilities are the building blocks of your operation. From customer management to risk management, each capability has defined processes, policies, and maturity levels.

Capabilities progress through maturity levels: Initial, Managed, Defined, Optimised.

STRATEGIC FRAMEWORK

Design Your Business Processes

Business processes orchestrate capabilities end-to-end. Visualize workflows, identify handoff points, and optimize for consistency and compliance across the organization.

Clear processes reduce risk, improve efficiency, and accelerate transformation.

HOW TO USE THIS

Get Started in 3 Steps

1. Explore the Value Stream Map to see all capabilities across value stages. **2. Analyze** the Heat Map to identify maturity gaps and focus areas. **3. Plan** using the Dashboard to track roadmaps and transformation initiatives.

All tools are interactive. Filter by lens, click to explore, and print for offline reference.

Explore Your Capability Architecture

Three tools, one vision. Understand your Land Tax operation at every level of detail.
